SUMMARY

I'm a final-year Computer Science student passionate about software engineering and building solutions that automate manual processes and solve real-world problems. I'm always eager to learn, improve my skills, and take on new challenges. My goal is to grow as a software engineer by working at a world-class technology company, where I can learn from experienced professionals and contribute to impactful products.

EDUCATION

Tanta University — Tanta, Egypt
Bachelor's in Computer Science (Expected Graduation: 2027) — *GPA: 3.4/4.0*

EXPERIENCE

Freelance Software Engineer — 2024 – Present
Mostaqel & Upwork — *Remote*

- Delivered full-stack web projects for clients using JavaScript/TypeScript, React, Node.js, and .NET.
- Built and consumed REST APIs, working directly with clients from requirements to deployment.

Full-Stack Web Developer (Apprenticeship) — Oct 2024 – May 2025
DEPI Training Program — *Hybrid*

- Developed full-stack web applications and RESTful APIs using C#, ASP.NET Core, and SQL Server.
- Collaborated with a development team using Git to build and maintain scalable applications.

PROJECTS

JobBoard | *Next.js, React, TypeScript, Node.js, PostgreSQL, Supabase*

- Built a full-stack job board connecting recruiters and job seekers with secure role-based authentication.
- Implemented job posting, application tracking, and recruiter dashboards via REST APIs on Supabase/PostgreSQL.
- Built a responsive UI with React and Next.js App Router using reusable components and protected routes.

Food Trucks Platform | *Node.js, Express, PostgreSQL, Knex.js, jQuery*

- Developed a full-stack platform connecting customers with food truck owners.
- Designed and built 22 RESTful API endpoints for orders, carts, menus, and user management.
- Implemented shopping cart, order placement, and order status tracking end-to-end.

FitPanel | *Blazor Server, ASP.NET Core, Entity Framework Core, SQL Server*

- Built a SaaS platform for fitness coaches to manage clients, diet plans, and workout routines.
- Implemented role-based access (Admin & Coach) and designed the relational database schema.

Afforestation Achievement System | *Blazor, ASP.NET Core, Entity Framework Core, SQL Server*

- Developed a full-stack afforestation management platform with Admin, User, and Viewer roles.
- Implemented secure CRUD operations and data visualization for plantation progress tracking.

CERTIFICATIONS

Complete SQL Mastery – Code With Mosh — 2024
Competitive Programming – ECPC Competition – Egyptian Collegiate Programming Contest — 2024
.NET Full-Stack Program – DEPI (Digital Egypt Pioneers Initiative) — 2024 – 2025

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, HTML, CSS, SQL, Python

Frameworks & Libraries: React, Next.js, Node.js, Express, Tailwind CSS, ASP.NET Core, .NET, Entity Framework Core, Blazor

APIs & Auth: REST APIs, MVC Architecture, Supabase Auth, Microsoft Identity, Authentication & Authorization

Databases: PostgreSQL, MySQL, SQL Server, Supabase

Tools & Practices: Git, GitHub, Postman, Vercel, OOP, Data Structures & Algorithms, Design Patterns, Competitive Programming
