Summary

Final-year Computer Science student graduating in 2027, with hands-on experience developing web and mobile applications using .NET, React, Node.js, and Flutter. Strong foundation in problem-solving, databases, REST APIs, and software design, with experience collaborating on team projects and developing solutions for real business needs. Motivated to learn, contribute to software development projects, and gain experience working with professional technology teams. Fully available for the February–July 2027 internship programme.

Education

Tanta University — Tanta, Egypt
Bachelor's in Computer Science (Expected 2027) — *GPA: 3.4/4.0*

Experience & Training

Full-Stack Web Developer – Apprenticeship — Oct 2024 – May 2025
DEPI (Digital Egypt Pioneers Initiative) — *Egypt*
- Developed full-stack web applications and RESTful APIs using C#, ASP.NET Core, Entity Framework Core, and SQL Server.
- Collaborated on team projects, applying OOP, database design, Git, debugging, and problem-solving skills.

Software Engineering Intern – Fall Internship — Fall 2024
InnoTech — *Egypt*
- Gained hands-on experience with .NET and Blazor, RabbitMQ messaging, and Redis caching.

Flutter Developer – Apprenticeship — Nov 2025 – Jul 2026
DEPI (Digital Egypt Pioneers Initiative) — *Egypt*
- Developed cross-platform mobile applications using Flutter and Dart, focusing on responsive interfaces and API integration.
- Worked with state management, authentication, application architecture, and backend integration.

Simulation Team Member – Formula Student AI — Jul 2026 – Present
University Racing Team – Student Activity — *Egypt*
- Worked on autonomous racing simulation tasks using Python, ROS, Gazebo, and RViz in Docker-based Linux environments.
- Collaborated with team members on simulation testing, troubleshooting, and technical discussions.

Cybersecurity Training — Aug 2026
National Telecom Regulatory Authority (NTRA) — *Smart Village, Egypt*
- Completed practical training covering cybersecurity fundamentals and security concepts.

Projects

Campeones – Multi-Branch Gym Management System | *ASP.NET Core, PostgreSQL, React*
- Developing a multi-branch platform covering memberships, attendance, sales, financial operations, and employee management.
- Designed a layered backend architecture with role-based access control, business workflows, and audit logging.

Hospital Clinic Management System | *ASP.NET Core MVC, EF Core, SQL Server*
- Built a clinic management system managing patients, doctors, appointments, prescriptions, billing, and medical records.
- Designed a 12-entity relational database and implemented role-based access, appointment conflict prevention, invoicing, and reporting.

FitPanel | *Blazor Server, ASP.NET Core, SQL Server*
- Built a SaaS platform for fitness coaches to manage clients, workout routines, and diet plans, with role-based access and a relational database.

Food Trucks Platform | *Node.js, Express, PostgreSQL, Knex.js*
- Developed a food truck ordering platform with menus, carts, order tracking, and 22 RESTful API endpoints.

Afforestation Achievement System | *ASP.NET Core MVC, EF Core, SQL Server*
- Built a role-based management system to record planting activities, manage data, and generate reports across multiple locations.

Certifications

.NET Full-Stack Web Development – DEPI (2024–2025)
Flutter Development – DEPI (2025–2026)
Cybersecurity Training – NTRA (2026)
Complete SQL Mastery – Code With Mosh (2024)
Competitive Programming – ECPC (2024)

Technical Skills

Languages: C#, Java, Dart, JavaScript, TypeScript, SQL, Python, HTML, CSS
Frameworks & Libraries: ASP.NET Core, MVC, Blazor, EF Core, Flutter, React, Next.js, Node.js, Express, Tailwind CSS
Databases: SQL Server, PostgreSQL, MySQL, Supabase
APIs & Security: REST APIs, ASP.NET Core Identity, Authentication, Authorization, Role-Based Access Control
Tools & Concepts: Git, GitHub, Docker, Linux, ROS, Gazebo, RViz, Postman, Vercel, OOP, Data Structures & Algorithms, Design Patterns, Repository Pattern, Service Layer
